

# UCTRONICS Smart Robot Car Scratch User Guide

Please note this document is a beta version, and you can always contact us at [support@uctronics.com](mailto:support@uctronics.com) for updated contents.

Step1:

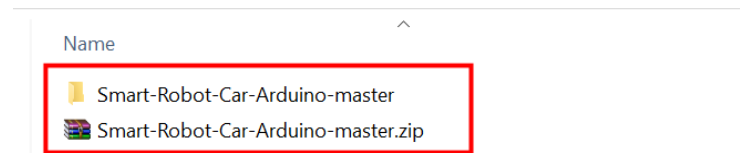

Download UCTRONICS Smart Robot Car firmware from <https://github.com/UCTRONICS/Smart-Robot-Car-Arduino.git>

Step2:

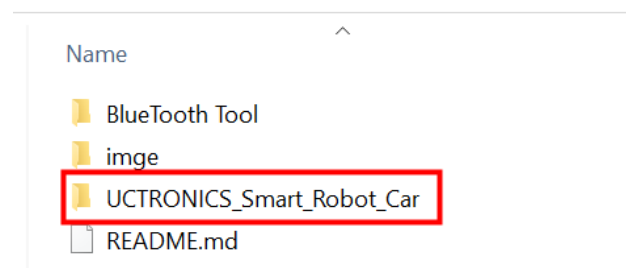

Unzip the Smart-Robot-Car-Arduino-master.zip file

This PC > Downloads

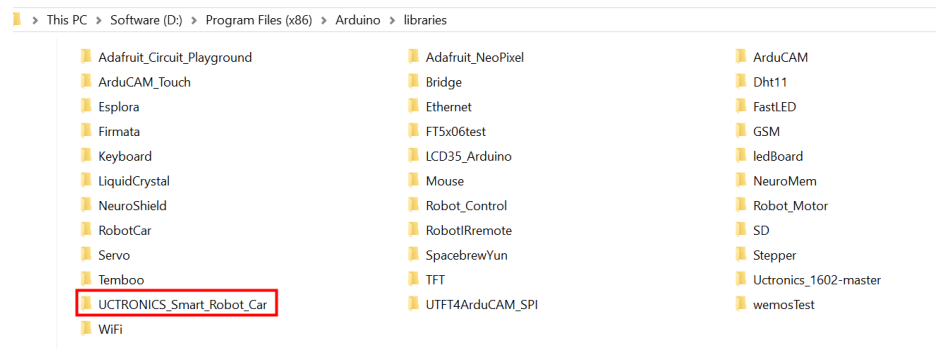

Then open the Smart-Robot-Car-Arduino-master

This PC > Downloads > Smart-Robot-Car-Arduino-master

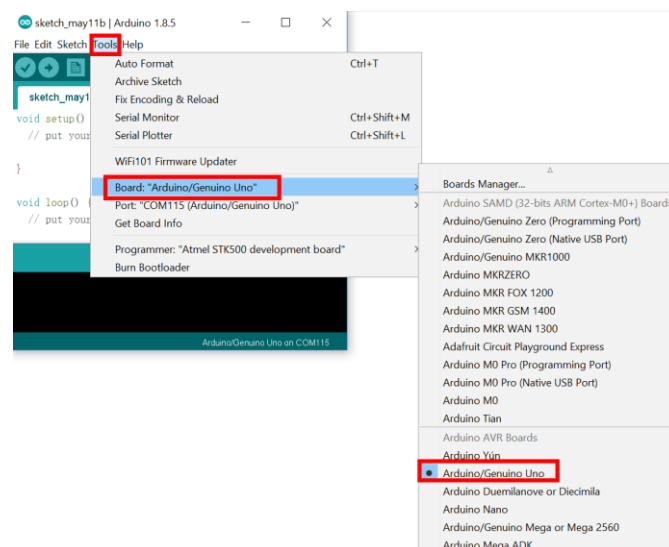

and copy **UCTRONICS\_Smart\_Robot\_Car** to **..\Arduino\libraries** path

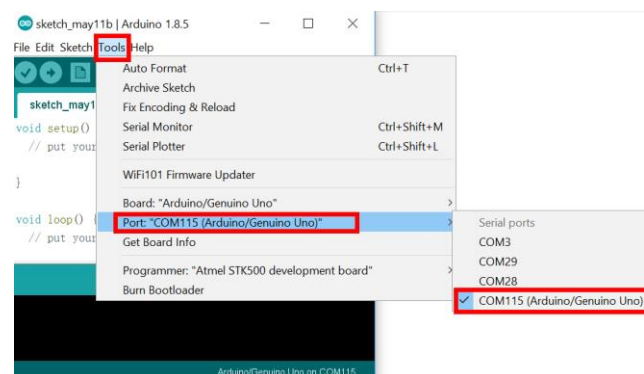

### Step3:

Open the Arduino IDE and choose the Tools-> Board->Arduino/Genuino Uno

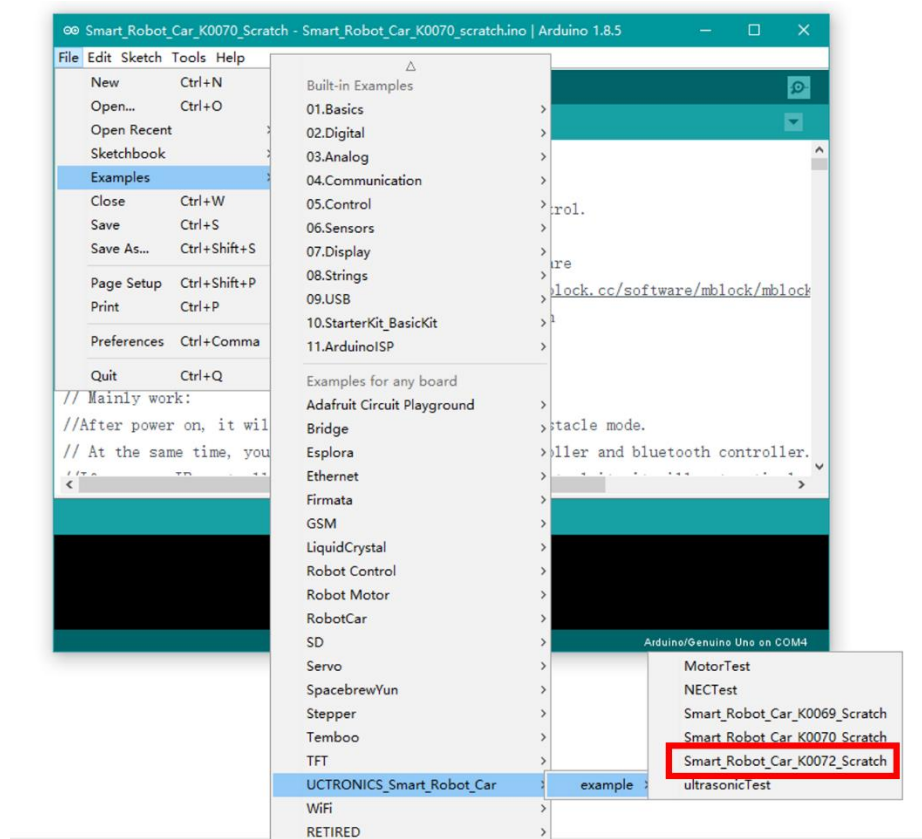

### Step4:

Choose the Tools->Port->Your (Arduino/Genuino Uno)port.

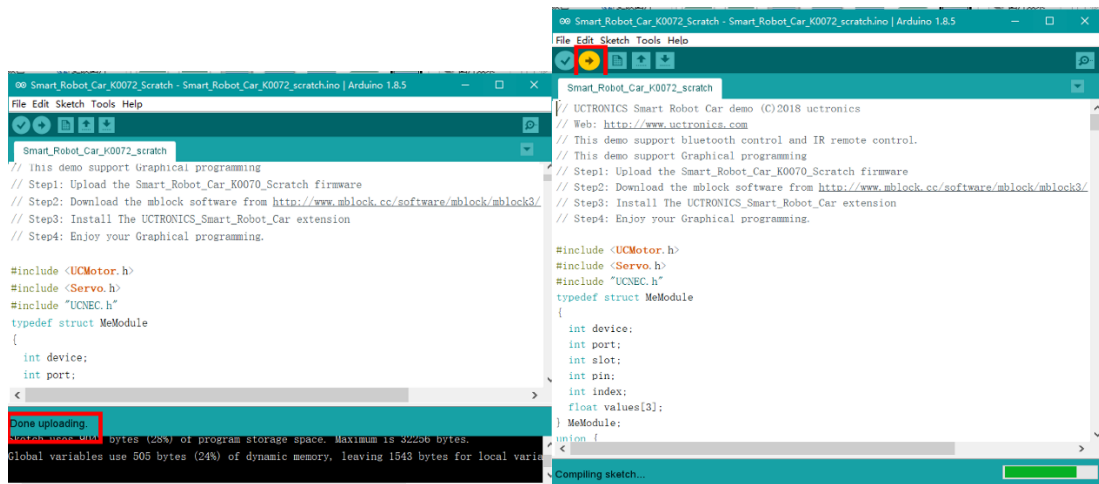

Step5: Choose the

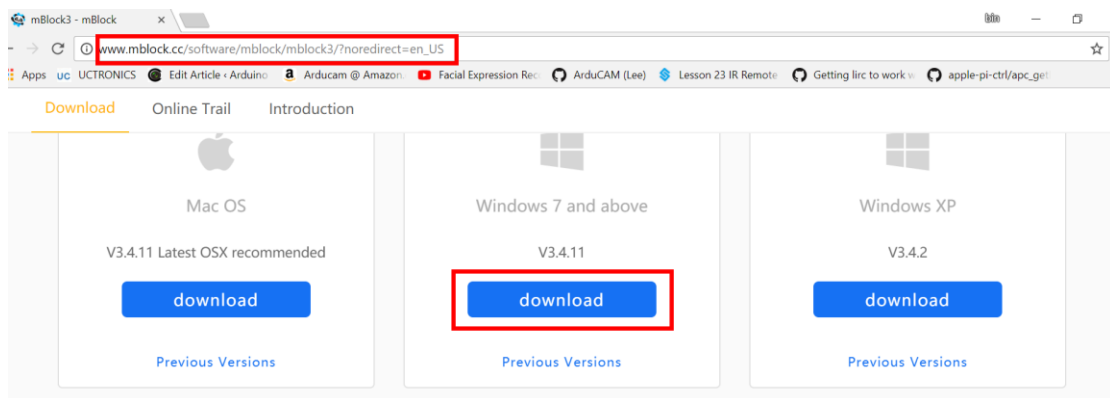

File->Examples->UCTRONICS\_Smart\_Robot\_Car->examples->Smart\_Robot\_Car\_K0072\_Scratch demo

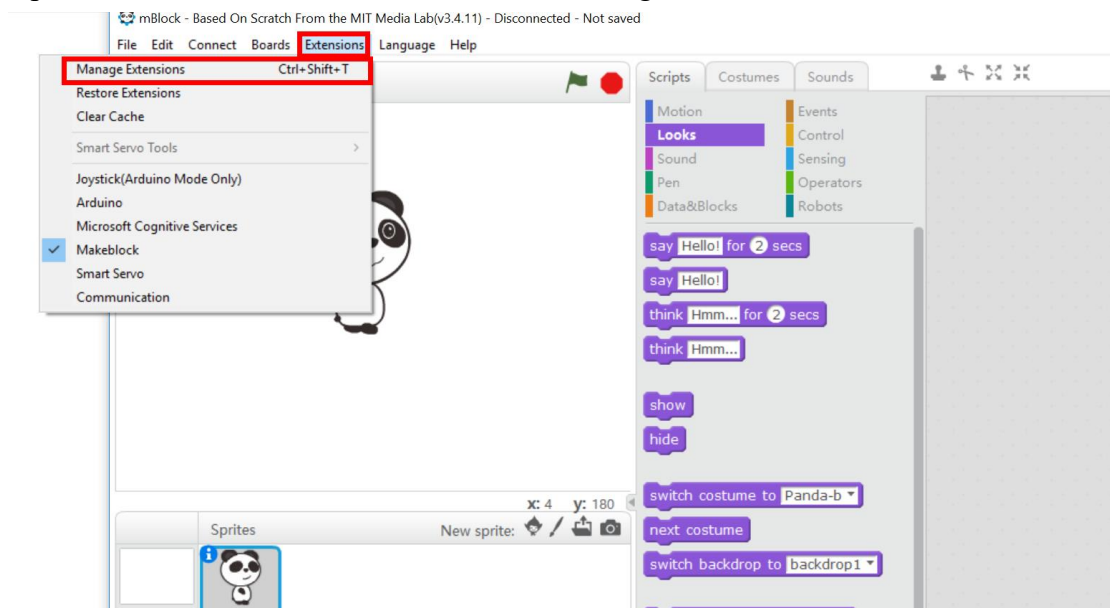

Step6: Compile and upload the demo to your arduino UNO board.

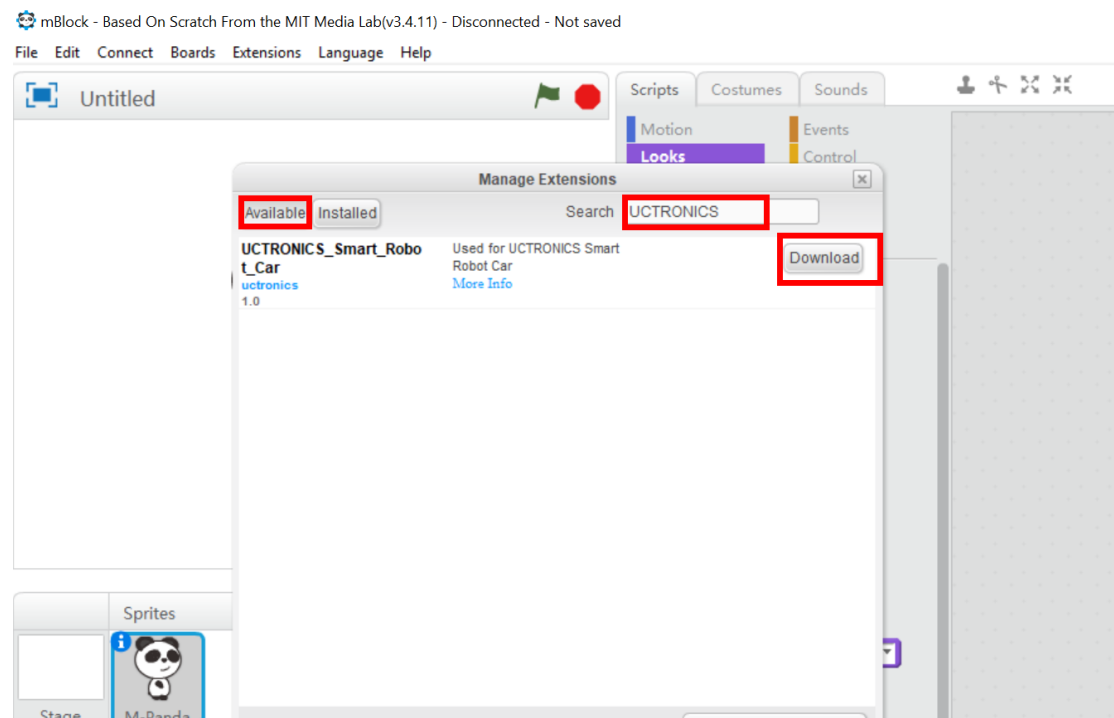

Step7: Download and install the mblock software from <http://www.mblock.cc/software/mblock/mblock3/>

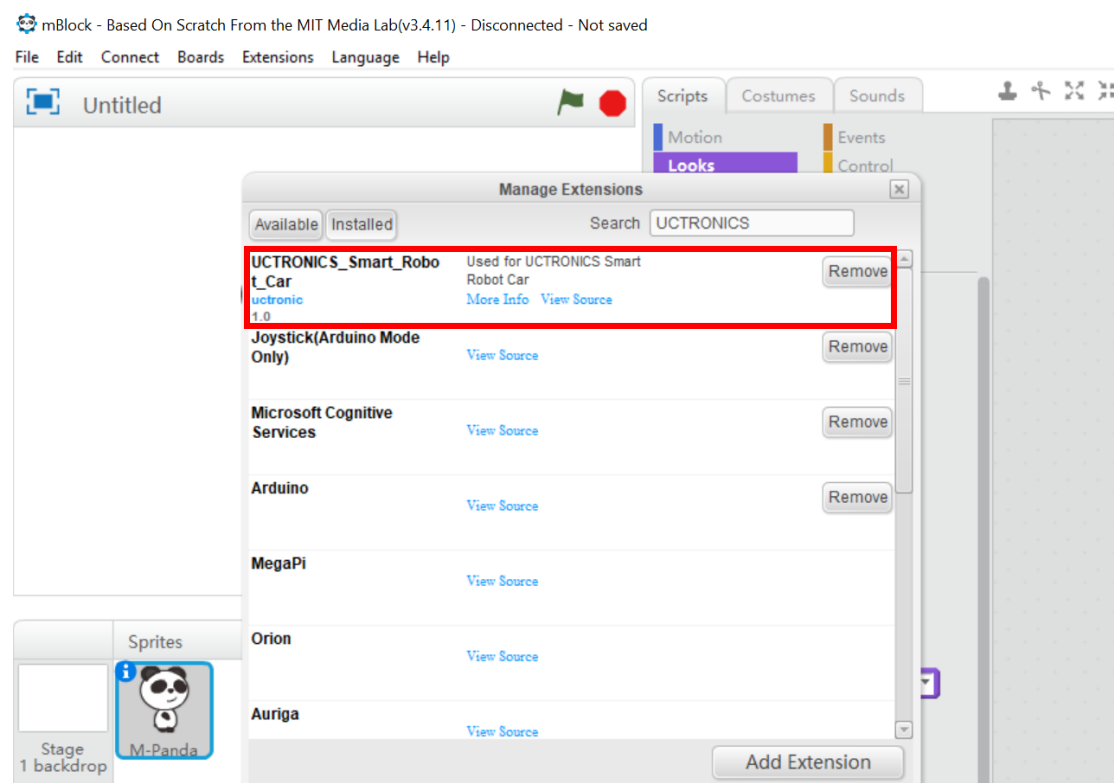

Step8:  
Open the mblock and choose Extensions ->Manage Extensions

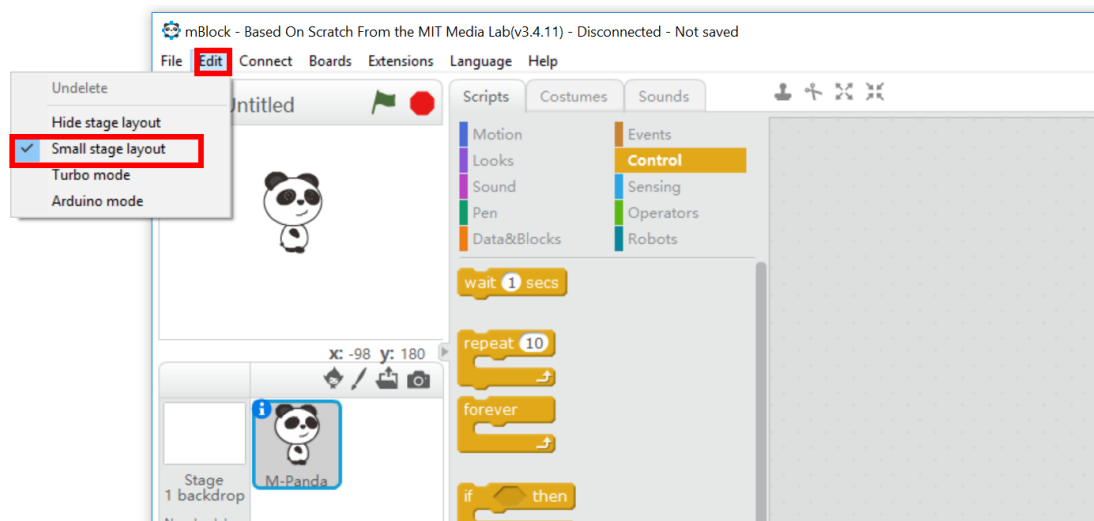

Step9: Click Available, then input the UCTRONICS\_Smart\_Robot\_Car in the Search. The click Download

Then you will see the UCTRONICS\_Smart\_Robot\_Car has been installed in the Installed

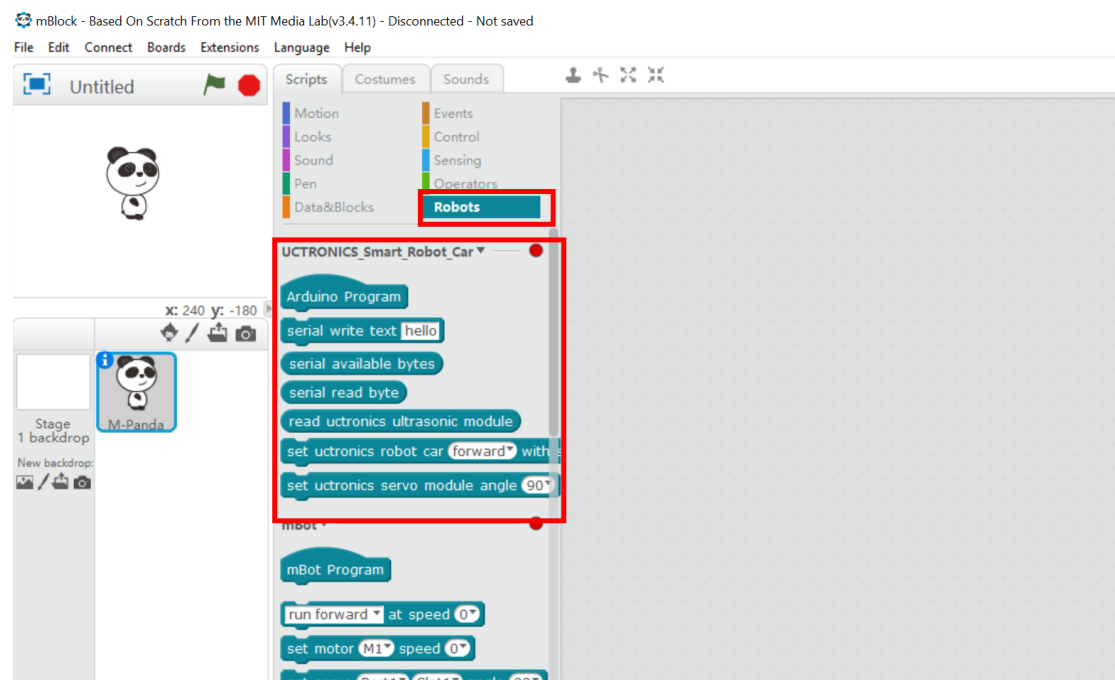

Step10:Choose Edit->Small stage layout

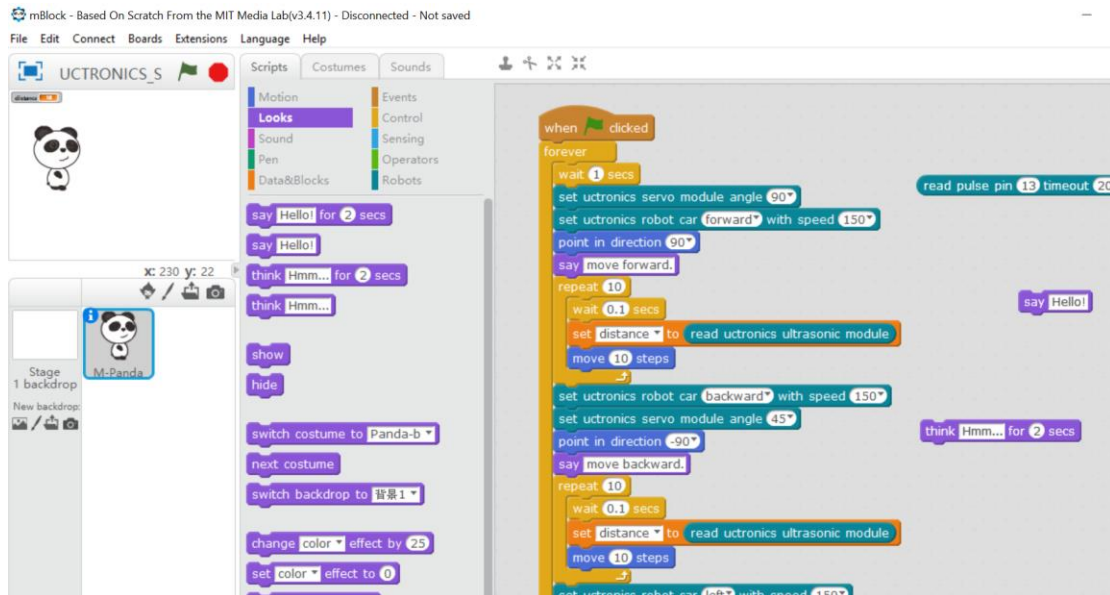

Step11:

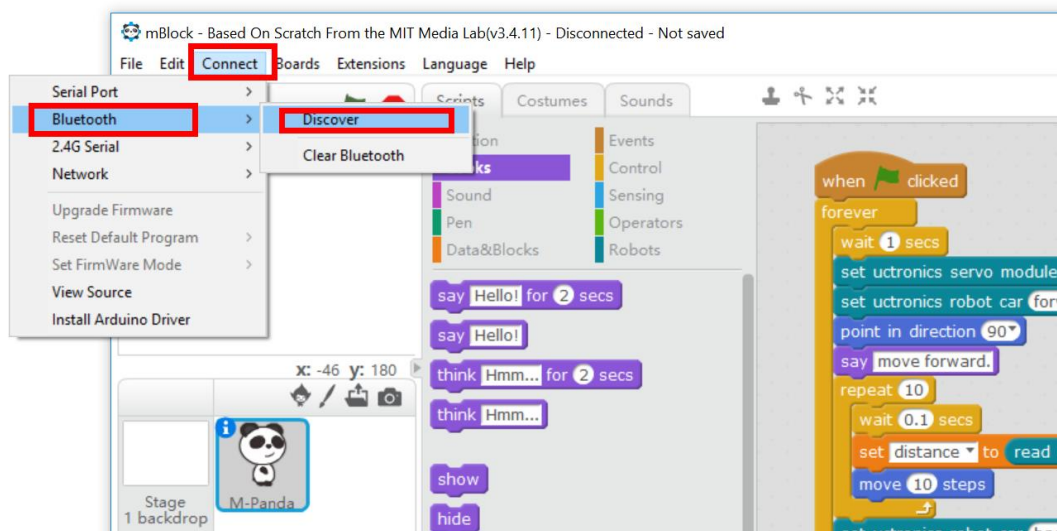

Then choose Robots, you will see the UCTRONICS\_Smart\_Robot\_Car extension

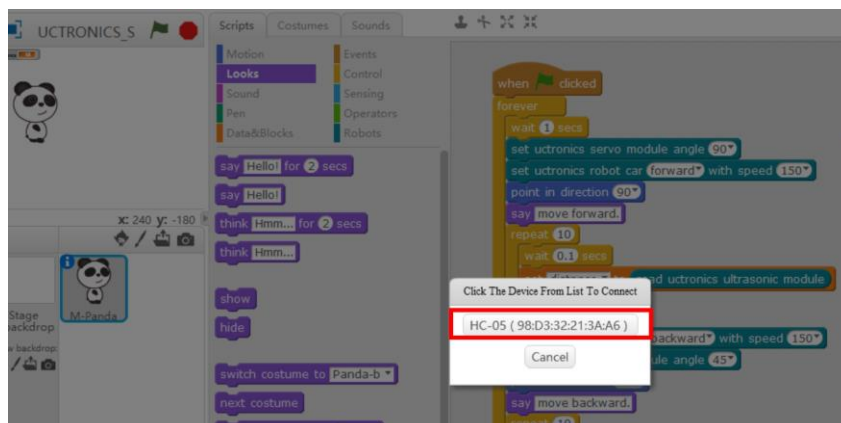

Step12: Now you can program the code by Dragging and dropping the blocks

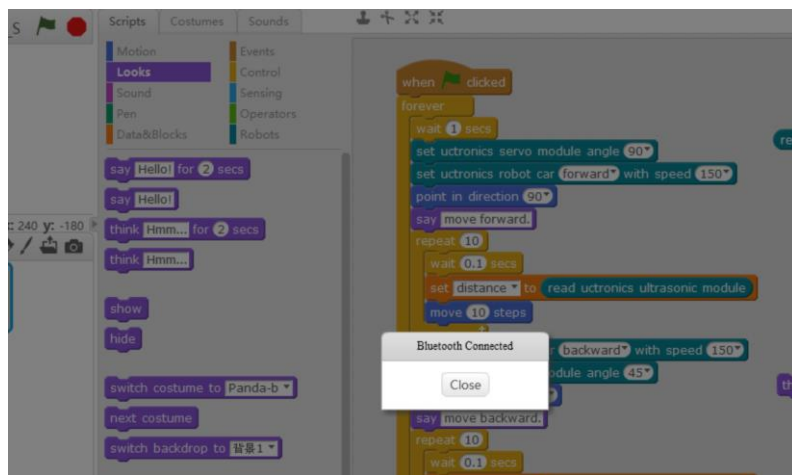

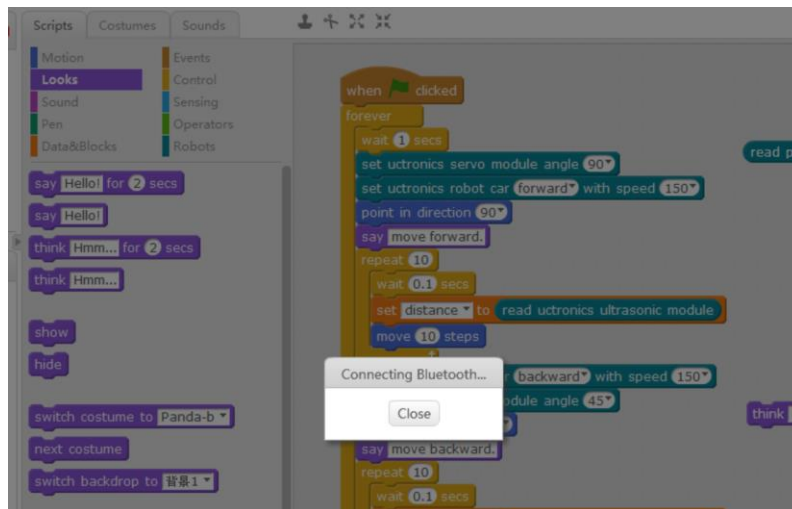

Step13: Connect the mBlock to the UCTRONICS Smart Robot Car by serial port or Bluetooth. We advise you use Bluetooth if your computer supports Bluetooth. Choose Connect->Bluetooth->Discover

Connect your Bluetooth module to the Smart Robot Car. Then you will search the HC-05

Just click it and wait for it to connect successfully

Then click Close.

Step14: Start and stop your program.
